23 July 2026

Mr Avirineni Jaidev Chowdary
Shamrock International School
Vijayawada, India

Dear Mr Chowdary,

LETTER OF RECOMMENDATION
AI INTERNSHIP FOR YOUNG ACHIEVERS

I am pleased to recognise your exceptional performance and commitment during the AI Internship for Young Achievers programme, conducted by Corporate Gurukul and the Institute of South Asian Studies at the National University of Singapore.

The programme evaluated participants on their ability to apply artificial intelligence and data-analytic thinking to a real-world problem, from framing the challenge through to building, evaluating and communicating a data-driven solution.

Your team's project addressed the challenge of customer churn in the telecommunication sector, where identifying at-risk customers is critical to minimising revenue loss. During the course of the programme, you demonstrated strong analytical skills and a clear understanding of the topic. Your contributions reflected careful attention to data quality and an ability to connect analytical insights with practical business considerations.

During the programme, you played an active role in your team's exploratory data analysis, its treatment of outliers, and its comparison of multiple modelling approaches. You engaged actively with feedback from faculty throughout the process, incorporating suggestions and refining your team's approach with each iteration.

Your quick-wittedness and ability to adapt and respond during group presentation was especially noteworthy. You collaborated effectively within the team, communicated ideas clearly, and maintained a structured approach throughout the programme.

Your performance reflects a strong potential for future academic and professional pursuits in data science and AI-focused research.

I wish you continued success in all future endeavours.

With warmest regards,

Dr Sanka Rasanayaka
Lecturer (Educator Track)
School of Computing
National University of Singapore
